Ernesto (Ernie) Ikerd

Senior Front-End Software Engineer

Dallas, TX | psylux@gmail.com | (214) 727-9722 | linkedin.com/in/ernesto-ikerd-6a5b108

Senior front-end engineer with 18 years of experience building web applications for Fortune 500 companies, the last ten in financial services at Fidelity, JPMorgan Chase, and Bank of America. Specializes in Angular and TypeScript, accessible UI, and data visualization. Principal engineer and tech lead for two Fidelity planning teams (2021–2024), owning releases and production validation. Works across the stack with Node.js, GraphQL, REST, and SQL, and builds side projects in React, Next.js, and Swift.

TECHNICAL SKILLS

Front end: Angular, TypeScript, JavaScript, React, Next.js, HTML5, SCSS/CSS, Tailwind, Nx monorepos
Accessibility & data viz: Section 508 (WCAG 2.0 AA), ARIA; Highcharts, Ag-Grid, Plotly, custom SVG charts
Back end & data: Node.js, REST APIs, GraphQL/Apollo, tRPC, SQL, SQLite/libSQL, Drizzle ORM, Firebase
Testing & delivery: Jest, Playwright, SonarQube, Git/GitHub, Jenkins, Artifactory, Nx Cloud, Docker, AWS, Datadog, Splunk
AI-assisted development: Claude Code, Codex, Cursor, GitHub Copilot
Also: Swift (macOS, AVFoundation), Python, C#/.NET, Adobe Photoshop and Illustrator

EXPERIENCE

FIDELITY INVESTMENTS (contract)
Software Engineer, Personal Investing | via Compunnel | Westlake, TX | Sep 2024–Present

- Build Angular features for Fidelity.com Wealth Management, including tools for financial advisors and clients across Personal and Workplace Investing, which serve 33 million clients.
- Build accessible, custom-styled interfaces and Highcharts data visualizations; contribute to API and back-end work.
- Run team releases through Jenkins and Artifactory: coordinate installs and validate every release in production.

Principal Software Engineer & Tech Lead, Personal & Workplace Investing | via Apex Systems | Remote (Boston-based team) | Jun 2021–Jun 2024

- Tech lead for the Planning Optimization and Scenario Analysis teams, owning DevOps, deployments, installs, and production validation.
- Built Angular features across Fidelity.com's Wealth Management, Retirement Planning, and Personal Investing experiences for advisors and customers.
- Applied accessibility and UX expertise across the teams' planning tools and built Highcharts data visualizations.

JPMORGAN CHASE | ***Software Engineer*** | Plano, TX (Remote) | Jul 2020–May 2021

- Developed Angular 9 front-end features for a platform replacing vendor document-processing products with open-source frameworks, for the team that handles all printed and emailed correspondence between Chase and its clients.
- Worked across TypeScript, SCSS, GrapesJS, Spring Boot, and Camunda workflows.

BANK OF AMERICA | ***AVP, Senior Web Developer*** | Plano, TX | Sep 2016–Mar 2020

- Built the front end for the first automated version of the bank's ATM web-development tool, adopting Angular while it was still in beta (Angular 2 beta through 4) with TypeScript and Node.js.
- Delivered UI for Global Engagement Management, a C-level tool used across Global Business Services to

track CIO partner engagements, onboarding and offboarding, and the talent pool.

- Built Angular (4–9) interfaces for enterprise test-case automation and resource management; converted legacy ATM software from C++ to AngularJS with test-driven development (Karma, Jasmine) for deployment to 16,000 ATMs nationwide.
- Won first place as part of a team in the company-wide 2018 BofA Rewards Challenge code-a-thon.

ESI ESTECH SYSTEMS | ***Senior Web Developer*** | Plano, TX | Nov 2015–Aug 2016

- Led UI, usability, and accessibility for customer-facing applications (AngularJS, Sass); built Node.js REST microservices and maintained PHP/MySQL applications.
- Built an internal Chrome extension that added click-to-call to the company's telecom application.

INFOR | ***Senior Front-End Developer (Accessibility)*** | Addison, TX | Oct 2014–Nov 2015

- Brought legacy HR user and admin interfaces into Section 508 compliance and resolved UI defects across HR applications (JavaScript, jQuery, AngularJS, Sass; Java/Spring JSP).

AT&T | ***Senior Front-End UI Developer*** | Dallas, TX | May 2010–Oct 2014

- Built and maintained AT&T's enterprise jQuery/AngularJS widget library, used across its technology teams, adding ARIA accessibility for the company's compliance initiative.
- Converted att.com desktop pages to responsive mobile layouts and built front-end features for the online phone and accessories store, used by millions of customers and generating billions in revenue (JSP, Oracle WebLogic, ATG, Adobe CQ5).

TXU | ***HTML GUI Developer (Consultant)*** | Irving, TX | Apr 2008–Feb 2010 | Built an AJAX (ExtJS) interface that gave call-center agents one screen for documents from OpenText Livelink, and front-end pages for the txu.com redesign on an SAP portal.

PROJECTS

Budget Lens, personal finance dashboard | Next.js 15, tRPC, Drizzle ORM, SQLite/libSQL, Tailwind

- Pulls live data from the YNAB and Plaid APIs to show pay-period budgets, safe-to-spend, recurring bills, and financing/APR estimates, with every chart hand-built in SVG; companion iPhone app.
- Runs in Docker on a home Raspberry Pi with an hourly scheduled sync; 43 automated test files.

CropTrimmer, native macOS video tool | Swift, AVFoundation, Core Image, FFmpeg

- Cuts, crops, color-corrects, and re-times multiple loops from a video in one pass, with optional AI color correction through OpenAI-compatible vision models (cloud or local). Tests run against real media to verify cut points, crop geometry, and safe exports.

Pluricook, recipe consensus and cost engine | React 19, TypeScript, Bun, SQLite, Plotly

- Collects several versions of the same dish from different sites, matches ingredients to USDA FoodData Central nutrition data, and visualizes where recipes agree and differ, with cost estimates.

Home lab: Docker services on a Raspberry Pi behind Tailscale, including a Next.js 16 home dashboard (weather, health, energy, calendar) and a voice-controlled Home Assistant wall display.

EDUCATION, CERTIFICATION & LANGUAGES

Electrical Engineering coursework, University of Texas at Austin; University of Texas at Dallas

Apollo GraphQL Graph Developer – Associate (2024)

Languages: English, Spanish (native)
